4. NEGA IN VZDRŽEVANJE

Les je naraven in živ material. Za njegovo uporabo in vzdrževanje je potrebna posebna pozornost. Les, ki je izpostavljen na prostem, sčasoma naravno posivi in izgubi svojo prvotno barvo, kar je povsem normalno.

Les je material, ki ima različne lastnosti, odvisne od njegovega bistva in izdelave.

Tkanine, uporabljene na izdelkih MATERIAL, so posebej zasnovane in preizkušene za uporabo na prostem. V vseh letnih časih vam bodo zagotovile udobje in prijeten dotik.

Čiščenje

Les je živ material, ki je zelo estetski, topel in učinkovit, vendar zahteva vzdrževanje. Leseno vrtno pohištvo je priporočljivo vzdrževati dvakrat na leto. Prvič spomladi in nato ob koncu poletja. Čiščenje opravite s krtačo in toplo milnico. Vendar ne s katerim koli milom. Priporočljiva je uporaba črnega ali marsejskega mila. Temeljito sperite z mlačno vodo. V nobenem primeru ne uporabljajte visokotlačnega čistilnika. Če želite, da les ohrani svojo prvotno barvo, uporabite brezbarven impregnacijski premaz, ki neguje les in dolgoročno varuje njegov naravni videz. Na les, ki ste ga očistili s suho krpo, dvakrat letno nanesite impregnacijski premaz v smeri lesne strukture. Če po čiščenju ostanejo madeži, lahko površino pobrusite s finim brusnim papirjem. To je prednost masivnega lesa. Če ste doslej zanemarjali vzdrževanje lesenega pohištva, še ni prepozno, da odpravite nastalo škodo. Ne glede na to, kaj želite doseči, preizkusite rešitev na neopaznem mestu in se prepričajte, da je rezultat takšen, kot si želite.

Prevleke za blazine, če jih je mogoče ločiti od blazin, perite v pralnem stroju. Večina blazin na izdelkih MATERIAL ima odstranljive prevleke. V nasprotnem primeru lahko trdovratne madeže odstranite z mokro gobo in šamponom za oblazinjenje.

Shranjevanje v zimskih mesecih

V primeru daljše neuporabe ali slabega vremena je priporočljivo, da izdelek shranite v suhem prostoru ali ga zaščitite z ustreznim prekrivalom.

Kadar izdelkov MATERIAL dlje časa ne uporabljate, je treba blazine in dele iz tkanine odstraniti. Blazine redno krtačite, da odstranite prah. Shranjujte jih v suhem in zračnem prostoru, da preprečite nastanek plesni ali neprijetnih vonjav.

5. PRITRJEVANJE

Zaradi boljše stabilnosti in varnosti približno dva tedna po namestitvi še enkrat zategnite vijake. Za dolgotrajno vzdrževanje zategnite vijake tudi vsaj enkrat na leto.

Ne zavrzi! Popravilo! Popravilo izdelka je hiter in enostaven način, da znatno podaljšate njegovo življenjsko dobo in ga ne zavržete. 4. CARE AND MAINTENANCE

Wood is a natural and living material. It requires special attention in its implementation and maintenance.

Exposed outdoors, wood naturally turns grey over time and loses its original colour, this is quite normal.

Wood is a material that has different qualities depending on its essence and its manufacturing.

The fabrics used on NATERIAL products are specially designed and tested for outdoor use. They will provide you with comfort and a pleasant touch in all seasons.

Cleaning

Wood is a living material that is very aesthetic, warm and efficient but it requires maintenance. It is recommended to maintain your wooden garden furniture twice a year. A first time in spring and then at the end of the summer. The cleaning is done with a brush and warm soapy water. But not with just any soap. The use of black soap or Marseille soap is preferred. Rinse thoroughly with lukewarm water. In any case, do not use a high pressure cleaner. If you want the wood to keep its original colour over time, use a "colourless saturator" that nourishes the wood and protects its natural appearance for a long time. Apply the saturator twice a year on wood that has been cleaned beforehand with a dry cloth and apply it in the direction of the wood fibres. If after cleaning, stains remain, you can then sand the surface with fine grain sandpaper. This is the advantage of solid wood. If you have neglected the maintenance of your wooden furniture until now, it is not too late to make up for the damage. Whatever your case, test your solution on an inconspicuous area to make sure the result is what you want.

Machine wash cushion covers if they are separable from the cushions. Most of the cushions offered on NATERIAL products are removable covers. If not, a wet sponge and upholstery shampoo will help remove stubborn stains.

Wintering

In case of prolonged non-use or bad weather, it is recommended to store your product in a dry place or to use a suitable cover to protect your it.

The cushions and fabric parts of NATERIAL products should be removed when not in use for long periods of time. Brush the cushions regularly to remove dust. Be sure to store them in a dry, ventilated area to prevent the development of mould or odours.

5. FASTENINGS

For better stability and for your safety, tighten the screws once again around two weeks after setup. Tighten the screws also at least once a year for a long-lasting maintenance.
